PROFILE

Actuarial Science Master's graduate (ULB, Brussels) with hands-on experience in life and non-life insurance pricing, reserving and risk management gained at Belfius Insurance and Prudential Beneficial Insurance. Combines actuarial modelling and statistics with Python, R, SQL and Power BI to automate calculations and turn complex data into clear decisions. Open to junior roles in actuarial science, risk, finance and data analytics.

CORE SKILLS

Actuarial & Risk: Life & non-life pricing · Reserving (Chain-Ladder, Bornhuetter-Ferguson, Cape Cod) · IBNR / RBNS · Multi-state & semi-Markov models · Monte Carlo simulation · Stress testing & model validation · Solvency II

Data & Tools: Python (pandas, NumPy, SciPy, Streamlit) · R · SQL · VBA · SAS · MATLAB · Java · Power BI · Advanced Excel · Automation & reporting

Finance & Business: Financial statement analysis · Credit risk & loan portfolio monitoring · Budgeting & reporting · Regulatory compliance

PROFESSIONAL EXPERIENCE

Actuarial Intern — Life Pricing & Products, **Belfius Insurance**

Brussels, Belgium · Feb 2025 – Jul 2025

- Contributed to pricing and managing life insurance products and to risk premium calculations.
- Automated recurring pricing and control calculations in VBA and Python for the pricing team.
- Contributed to initial pension fund management work, preparing data and assumptions used by the team.

Actuarial Intern — Underwriting, Pricing & Risk, **Prudential Beneficial Insurance**

Douala, Cameroon · Sep 2021 – Sep 2022

- Rotated across underwriting, life and non-life pricing and risk management teams.
- Prepared and verified pricing data and technical rates used in underwriting decisions.

Financial Assistant, **CAPOCOP**

Littoral Region, Cameroon · Oct 2020 – Sep 2022

- Analysed client financial statements and repayment capacity to support credit decisions.
- Monitored loan portfolio performance and ensured compliance with internal credit rules.

SELECTED PROJECTS

MarkovReserve — Individual Claims Reserving Engine

Python, Streamlit · markovreserve.streamlit.app

- Multi-state model of individual claims (IBNR, RBNP, RBNS, closed) with Monte Carlo estimation.
- Benchmarked against Chain-Ladder, Cape Cod and Bornhuetter-Ferguson; computes the one-year CDR.

PensionView.be — Automated Actuarial Reporting

Web platform · pensionview.be

- Structures pension and benefits data into recurring reporting workflows for Employee Benefits teams.

EDUCATION

Master of Science in Actuarial Science, **Université libre de Bruxelles (ULB)**

Brussels, Belgium · Sep 2022 – Jan 2026 (expected)

- Thesis on semi-Markov multi-state individual claims reserving in non-life insurance.

Exchange Programme, **Université catholique de Louvain (UCLouvain)**

Louvain-la-Neuve, Belgium · Sep 2023 – Aug 2024

Master's Degree in Financial & Economic Engineering, **University of Dschang**

Cameroon · Sep 2018 – Jun 2022

LANGUAGES & ACTIVITIES

Languages: French (native) · English (fluent) · Dutch (elementary, CVO Semper) · Spanish (basic)

Activities: Mathematics tutor at Schola ULB (2022–2023) · volunteering and community involvement.
